Subject: Re : Redress Discrimination

Honourable Persons ,

I put it to you that an oversight exists , in that equal opportunity has been forsaken ; and that one group of people whom have suffered harm" in care " , are purposefully treated favourably over other victims , whom have also suffered abuses " in care."

Only one solution exists.

Overarching Redress governance for ALL victims of ALL abuses within a single auspice. A one stop shop for Redress for every victim of institutional abuse in care , abuse in institutionally placed care , and foster care placed victims of abuses , singly or multipivly inclusive of sexual , physical , psychological and psychiatric .

A universal onerous failure of duty of care has existed . Help close the door on the past. We are all equal and must be almed with redress equally.

Gradiation of harm , a so called " Table of maims " type console for trustees to distribute redress from. This exists within the Transport Accident Commission as a working example of a theoretical and non-discriminatory " UNIVERSAL " parameters of redress distribution.

Sincerely ,

[REDACTED]
